

SUMMER INTENSIVE READING BOOT CAMP

From home!

“Summer learning loss” is real – your child is at risk for losing several months’ of reading skills this summer when out of school.

Are you concerned...

- That your child is behind in reading?
- That next school year will be too challenging?
- That your child is bright, but is not learning as quickly as you’d like?

Fast ForWord® is a reading intervention that uses the principles of neuroplasticity - the ability of the brain to rewire and improve - to target the root causes of slow reading and learning progress. It works *fast* because it is more intense than other reading interventions

How is Fast ForWord different?

1. **It targets the root cause:** other programs may work around an underlying issue, accommodating an underlying processing weakness, like a “band-aid”. Fast ForWord addresses the foundational memory, attention, and processing weaknesses that may be holding your child back.
2. **It’s intense:** no other program or intervention provides the level of intensity that Fast ForWord provides. This intensity leads to fast change and lasting improvement; the intervention does not need to be repeated.
3. **It’s research-based:** validated by studies at Stanford, Harvard, MIT, Rutgers, and other prestigious institutions, Fast ForWord continues to be independently proven to work for various language and reading issues.

Who is it for?

Ages 5+. Proven to work for learners with reading delays, dyslexia, speech/language issues, ADHD, autism, auditory processing issues.

**Summer is the single best time to make
FAST reading improvement.**

SIGN UP NOW – SUMMER SESSIONS ARE STARTING SUMMER 2016.
